

Split Event Option

Split Event Instructions For Events Split Online

The following is an option for downloading and setting up the software for split events for USA Diving Championship meets or meets using the option to split events online.

From the main menu of the DiveMeet software

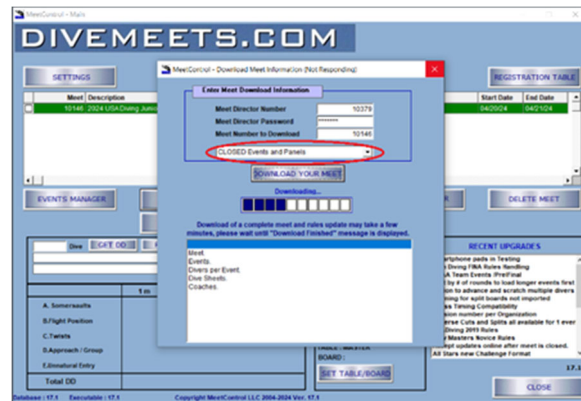

- Click on Data Management

- Click on Download your Meet

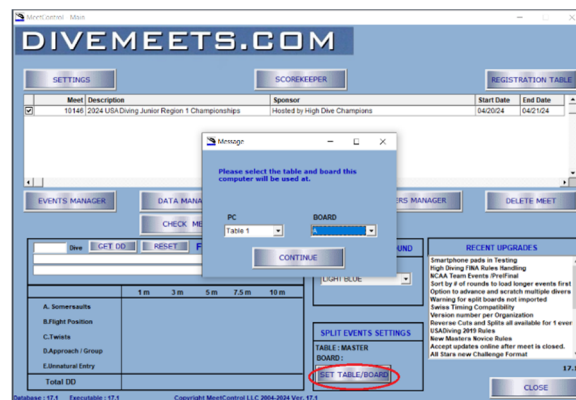

Split Event Option

- Meet Director
- Meet Director Password
- Meet Number to Download
- From pull down menu select CLOSED Events and Panels

Note: When using the CLOSED Event and Panel option, the closed events and the judge panels created online will be downloaded with the judge panels attached to the event they were created for.

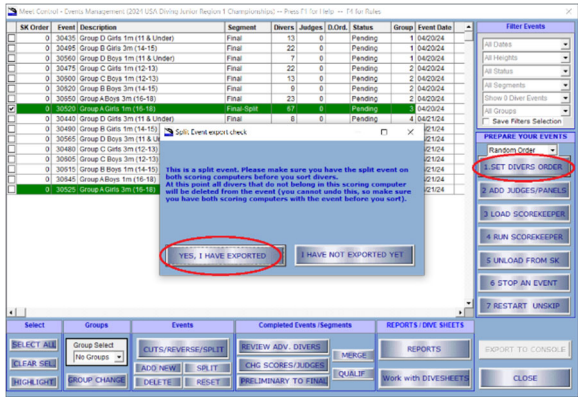

Software setting for split events

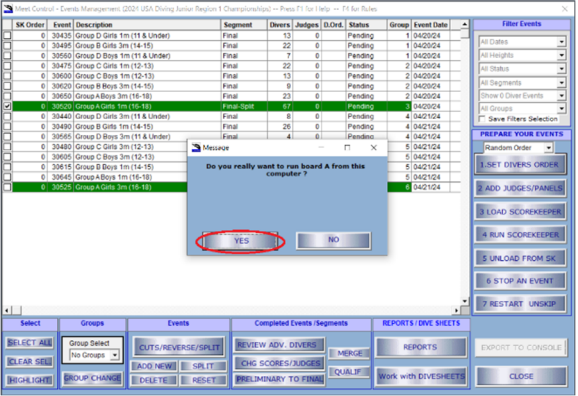

- Click Set Table/Board
- From drop down menus select table and board label

Note: Selecting the Table (x) lets the software know the computer used is a scoring not a master computer. The board assignment is whatever was used to label each board.

Split Event Option

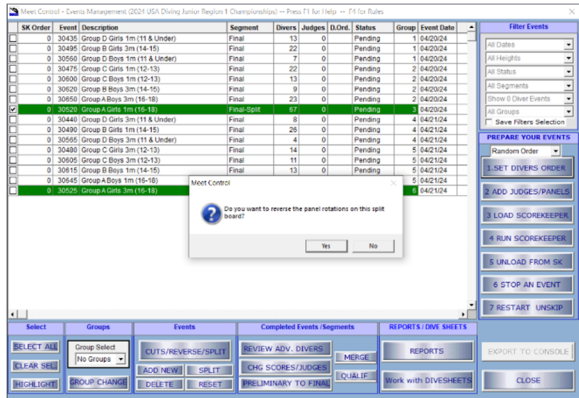

- From event manager page, click on set dive order, the above message will appear. Select, Yes I have exported, because you are downloading the event from the website for both scoring computers, no exporting is necessary.

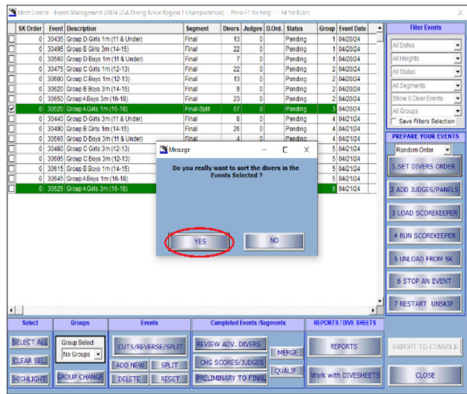

- The above message ensures you wish to run the board you selected on the main page, clicking yes scratches all the other diver from the other board you assigned.

Split Event Option

- Select No if you are starting judge panel A on this board, on the other scoring computer select yes to start with using judge panel B. Sometime in the event you will rotate the judge panels so all judges on both panels will judge the divers on both boards.

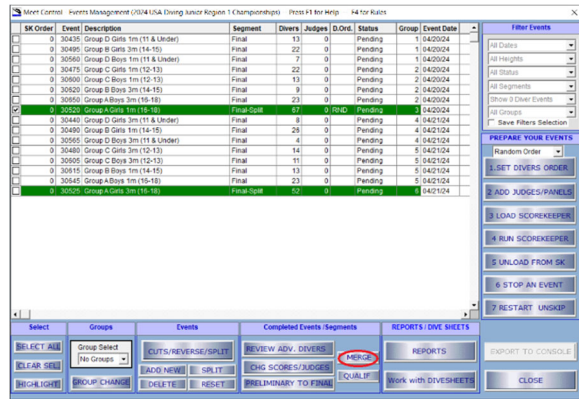

- Click Yes to set the dive order

The board (X) computer is now ready to be loaded to scorekeeper to print reports and run the event

Split Event Option

As soon as the event has ended, export results from one of the scoring computers using a USB drive, then take the USB drive to the other scoring computer, insert, and select import results.

From the Event Manager Page select Merge, you are now ready to print results
